

Coaxial Cable Internet Benefits for Business

What is Coax Internet?

Coaxial cable internet is a broadband web service that takes advantage of the infrastructure originally used to send television signals.

What are the Benefits of Coaxial Cable for Internet?

Speed

Typical cable internet speeds range anywhere from 512 Kbps to 52 Mbps. While this is a large range, cable internet speed has a high upper limit.

Reliability

Business owners enjoy that coaxial cable internet also tends to be more reliable. Signals remain relatively consistent at all times; cable broadband operates at 99 percent of its advertised speed.

Data Volume

Cable broadband is able to handle a large volume of data from a wide variety of applications. This is ideal if your company regularly performs activities that require large amount of data to be transmitted at once.
