What is eero Insight?

eero Insight is a specialized web portal that allows you to manage your Business Network. If you'd like to learn more about eero for Business please [click here](#).

Who can access eero Insight?

eero Insight can only be accessed by Business Network Owners. Users who are network admins will not have access to the application.

How do I access eero Insight on my Desktop?

To login to Insight from the Web you may go to insight.eero.com and use your eero account credentials to login. This site is not available in the web/desktop version if you use the "login with Amazon" option. If you have linked your amazon account please follow the steps for the mobile option below.

You may also access Insight through our mobile app by following these steps:

1. Download the eero app from either the [Google Play Store](#) or the [iOS App Store](#).
2. Login to your account using either your Linked Amazon Account or the email address associated with your eero account.
 - a. If you have more than one network, select the appropriate business network.
3. You can now manage your business network via Insight by navigating to Settings>Access eero Insight.

What can I do in eero Insight?

eero Insight allows you to:

- View Network Status
- View eeros on the network.
- View connected device information
- Manage profiles
- View Users
- View Network Analysis Dashboards such as Reboots, Channel Utilization and Thermal Analysis
- View Network Activity such as Speed Tests, Bandwidth Usage and
- Setup your multiple wireless SSIDs on your business network (up to 4)
- Set up and upload Captive Portal images and ToS.

The screenshot displays the eero Insight web interface. At the top, the user is logged in as Brad Smith. The main header shows the network name 'Civil Goat Coffee 1' and a 'Business' tag. A sidebar on the left contains navigation options: Network, Details, Users, eeros, Devices summary, Network settings, Business settings, eero Subscription, eeros, Devices, Profiles, Users, Network analysis, Activity center, Topology map, Event stream, and Audit logs. The main content area is titled 'Details' and lists various network parameters:

- Main SSID Name:** Civil Goat Coffee Main
- Connected Status:** Connected
- Business Identifier:** Civil Goat Coffee 1
- ISP:** AT&T
- Timezone:** America/Los Angeles
- UPnP Status:** Enabled
- Country Code:** US
- Public IP:** 162.207.207.12
- SSIDs:** 2 Enabled [View Business settings](#)
- Geo IP:** United States: Oakland, CA
- Troubleshooting:** 5GHz Active [Temporarily disable 5GHz](#)
- eero Subscription:** Active (eero for Business)
- WAN Speed from Last Test:** 854.24 Mbps down, 917.66 Mbps up, 2020-7-19, 7:27am. Includes links for [Run speed test](#) and [Past speed tests](#).

Below the details, there is a section for 'eeros' with an 'Add' button. A summary states 'Currently on this network 3 in total'. Three device cards are shown:

- Gateway: Employee area:** Connected, Gateway, Wired. IP: 192.168.4.1, Serial: GA133448HG7QJ9KX, Model: eero Pro 6e, MAC: 6c:ae:f6:33:51:00.
- Leaf: First floor:** Connected, Wireless. IP: 192.168.4.1, Serial: GA133448HG7QJ9KX, Model: eero 6+, MAC: 6c:ae:f6:33:51:00.
- Leaf: Second floor:** Connected, Wireless. IP: 192.168.4.1, Serial: GA133448HG7QJ9KX, Model: eero 6+, MAC: 6c:ae:f6:33:51:00.

How to enable multiple SSIDs.

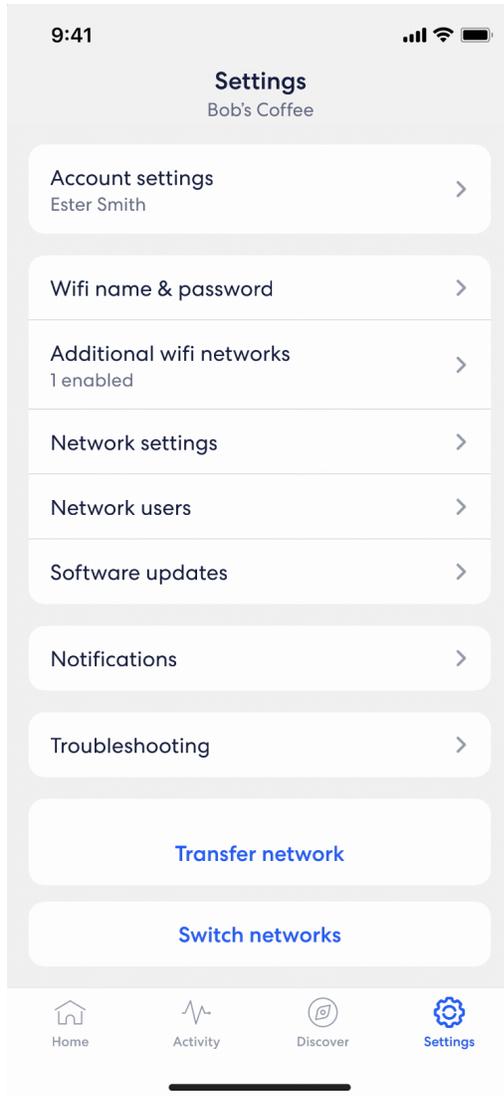

From eero insight:

1. Click on 'Business Settings'
2. Click on 'Add WiFi Network'
3. Choose either 'Business WiFi' or 'IoT WiFi'
4. Enter your new WiFi Name and Password
5. Click Save

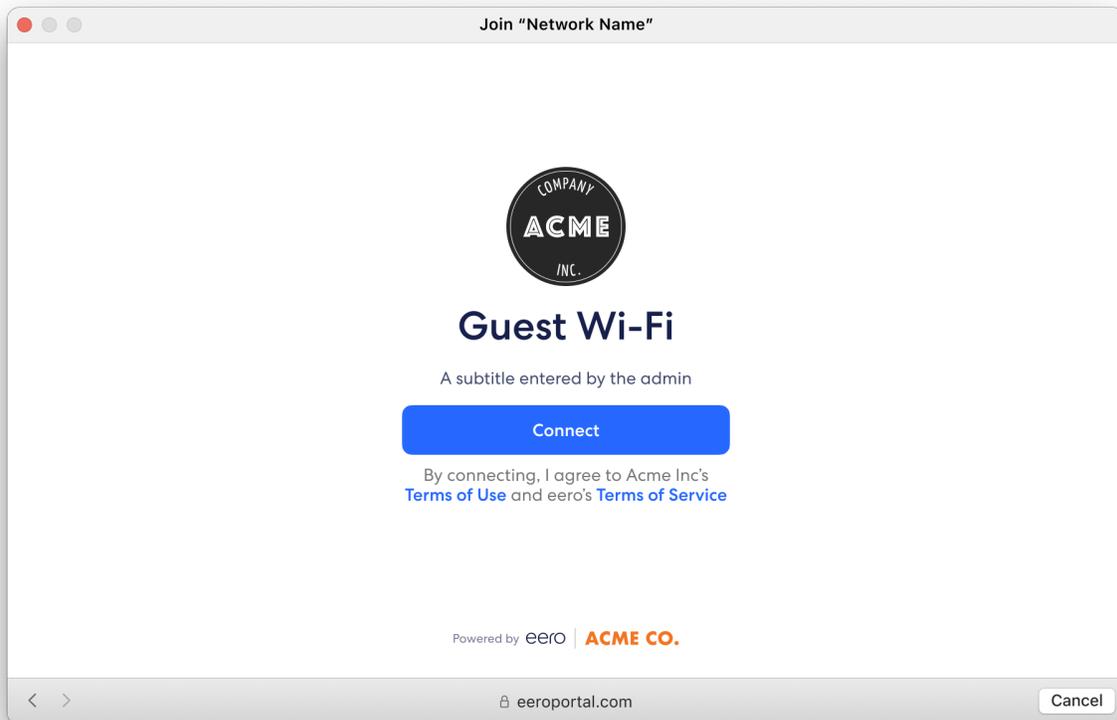

You may also enable/disable your WiFi networks by clicking on the network and sliding the enabled slide to off.

How to upload your own Captive Portal from the app.

1. Open the eero app.
2. If you have multiple networks, select the one you wish to work with.
3. Tap into 'Settings'
4. Tap on 'Additional wifi network' > 'Guest Network' > Captive Portal > Configure on eero Insight
5. Click on 'Click to Upload' under 'Logo'
6. You may also upload your own custom ToS towards the bottom.

**Please note that Captive Portal Images should be in the minimum resolution of 200x200px as a 5 MB or less PNG File.*

How to upload your own Captive Portal from the web.
